

Washington D.C.- Congressman Steve King (R-IA) today encouraged American taxpayers to visit the "It's All Your Money" online calculator created by Fox News. The calculator allows Americans to determine their individual share of the \$105 Billion included as automatically appropriated funds in the unconstitutional ObamaCare law. The online calculator bases its results on Congressman King's analysis of a Congressional Research Service report detailing the automatic funding provisions buried within ObamaCare.

"While working to repeal and defund ObamaCare, I introduced legislation to the continuing resolution that sought the elimination of \$105 Billion in automatic funding contained within the law," said King. "Now, Fox News has used my work to create a useful calculator that Americans should use to determine how much Congress's failure to block this money will cost them on an individual basis. I believe that when Americans learn how much they are being asked to spend on this unconstitutional law, they will demand that Congress take action to block these funds from being spent."

The "It's All Your Money" calculator may be accessed at the following web address:

<http://www.foxnews.com/topics/calculator/mandatory-funds-in-health-care-law.htm>

After determining their individual share of the automatic funding in ObamaCare, visitors to the site can vote on whether they support or oppose the law. At the time of this release, 93% of those voting were opposed to ObamaCare.
